It was released in 2006. The game has been translated into Chinese for the first time, and it can be played with Chinese pinyin characters and English text. The pinyin words were translated by Xia. Contents Story The storyline is much different from the 3D game. The plot is mostly same, but it has a few differences. Taichi starts the game as the captain of the Ikari company. After defeating Kunoichi, he goes to Amagasaki to find Ryosuke. To meet with Ryosuke, his party first visits his house, to know Ryosuke is a good person. In the house, Taichi meets his love interest, Ren, and decides to marry her. After meeting Ren, Taichi suddenly goes to an unknown world, the Edge of the world. Taichi and his companions follow him to the Edge of the world.

When Taichi goes into the Edge of the world, he sees many tombs that are called Dimension Gates, and he finds his partner Ryosuke's tomb. Then, he finds the mysterious beings, the dark ones, and he meets with the 12 great lords of the Demon God. The 12 great lords and Taichi have a war, and Taichi and his companions try to rescue Ryosuke, and try to stop the war. As you know, you can go into the past in the game. Now, let's talk about the story of the two great lords. Taichi and the 12 great lords. (Prince among the 12 great lords) The 12 great lords were the predecessor of Taichi and Ryosuke. They tried to stop the war by use of the power of the balance of the earth. They even tried to stop the war after they lost their powers and became weak. The lords, whose energy are stolen by the dark beings, go into the dimension called Edge of the world by the dark ones.

But the twelve lords are so strong that they even tried to stop the war after losing their powers. Gameplay Gameplay has not changed much from the 3D game. You can enter the time past in the game and play it with 3D graphics. You can also start with the new character, a new character, a new special attack. Also, the difficulty has increased. Stages and Characters As I said before, you can go into the past in this game. You play it with 3D graphics in the following stages. Time Past Stage
