INSTALLING MAC OS X INTO A FLASH DRIVE Getting ready to create your Mac in a Flash Drive! This is the process that we follow to do this: Get your Flash Drive. We recommend a 64GB or greater Flash Drive. Insert your Flash Drive, open Disk Utility, and format the drive. Select a name for the drive. Select GUID Partition Map (GUID = Globally Unique Identifier). Apply the changes and Quit Disk Utility. Next, we will make a folder on the Flash Drive and install OS X. Insert your Flash Drive, open Finder, go to it, and create a new folder. Rename the folder to install. Copy your Mac OS X installer. Open Disk Utility again. Create a new partition on your Flash Drive. Applying the changes, and Quit Disk Utility. Rename your new partition to Mac OS X. Reboot your Mac and plug in your Flash Drive. Go to your Mac's Setup Utility, and you should see your new Mac on the list of

KEYMACRO Description: Quick Router Setup allows yo to set up wireless router using simple wizard interface. It also allows yo to create several new wireless networks automatically. Show MoreShow LessThe present invention relates to a fluid tight sealing ring for a low-viscosity industrial fluid. It is known to provide a fluid tight seal between an annular flange and a tubular member, for example, to seal a first tubular member to a second tubular member of a refrigerant or air conditioning system. For example, U.S. Pat. No. 5,524,479 discloses a sealing ring for a cooling system having a bore and a refrigerant line extending through the bore, wherein the sealing ring is disposed about the line. U.S. Pat. No. 5,683,685 discloses a sealing ring for a refrigerant line having a bore, wherein the sealing ring includes a cylindrical insert portion having a helical groove on an inner surface of the cylindrical insert portion and a substantially smooth outer surface. The insert portion is disposed within the bore and is compressed thereagainst in a first direction by a rod, thereby forming an annular lip, which is compressed against the refrigerant line in a second direction opposite the first direction. However, the compression of the ring of either of the above-described patents results in a relatively high torque being required to install the ring, and consequently, special care must be taken to avoid over-torquing the ring, which can cause the ring to become dislodged from the seal or the seal from the tubing. Therefore, there is a need for a fluid tight sealing ring which is installable using a relatively low torque, to facilitate the installation of the sealing ring and reduce the risk of over-torquing the sealing ring.Q: React - access parent from within a 1d6a3396d6

This software program has been reviewed with care and loaded to be protected to work without any flaw. LinkShields is an online backup system to keep your important and business data safe. It's a very easy way to backup your important data and the internet connection won't be interrupted during the backup process. LinkShields offers 3 user-friendly interfaces; one for Windows, one for Apple and one for Linux. LinkShields Features:

- Back up data online: After the download, simply login to your LinkShields account and upload your data to your secure account.
- Schedule your backups: You can schedule the backup process at any time you wish.
- Backup your data: You can select files or folders to be backed up and select a location for backup.
- Generate easy to understand reports: Just select your backup location and view the reports or download them.
- Completely encrypted: Encrypts your data with 256-bit AES encryption and the key is generated on-the-fly.
- Multiple location backup: Allows you to easily back up data to various locations, such as portable drives, networks and even email accounts.
- Online & offline data protection: If your connection fails for some reason, your data will still be safe.
- Security options: You can enable or disable IP and MAC addresses filtering, while you can also encrypt the LinkShields password or keep it as is.
- Secure backup options: To make your data even more secure, you can prevent anyone from accessing your account or choose the number of days to keep your account active.
- Commercial & free support: You can choose to buy commercial support or get help from the community.
- Spam protection: Enables you to block IP addresses you don't want to receive.
- Easy-to-use backup interface: Our designers have worked hard to create a user-friendly interface and organize the data into the logical sections that are needed for backup.
- Restore data: If you need to recover deleted files, just login to your LinkShields account and you will be able to restore your data.
- Data compression: You can decide to use data compression or not during backup, but it will save you more time in the long run.
- Enhanced backup security: If you are trying to use the free account, you will have a limitation of 10GB. In the paid account, you can use unlimited data.
