Hot Alarm Clock V4.0.4.0 Incl Loader-SND [TorDigger] 64 BitQ: Injective on surjective functions I cannot understand the proof of an injective on surjective function. Could someone explain? Thank you so much. A: We can use the contrapositive. Let $f: X \rightarrow Y$ and $g: Y \rightarrow X$ be a pair of functions, and suppose that $f \circ g$ is surjective, but $g \circ f$ is not necessarily injective. Then f is not necessarily injective. If not injective, then g is not necessarily surjective. If g is surjective, then f is not necessarily surjective, or $f \circ g$ is surjective, but $g \circ f$ need not be surjective. Note that $f \circ g$ being surjective is equivalent to $g \circ f$ not being injective. Κυπριακή Προεδρία:
