History The AutoCAD history goes back to 1983, when AutoCAD was released as a desktop app for Apple II and IBM PCs. AutoCAD first became a commercial product in 1986, when the hardware platforms were extended to the high-performance RISC microcomputers (Intel 80386, etc.), the impact of the 3D graphics chips (GRID, etc.) and the popular desktop Windows platform. With AutoCAD 3D engine and AutoCAD Map Editor (see below) it became possible to use a single program for drawing and editing (drafting and design) as a 2D- and 3D-compatible design tool. There are three different versions of AutoCAD: AutoCAD LT, which started as a limited edition of the desktop software for the Apple IIe and was later released for the Macintosh. AutoCAD 2009/2010, a CAD/BIM program for the Windows platform, and the successor to AutoCAD LT. AutoCAD LT 2013, a more limited version of 2009/2010, which is a Windows-based CAD/BIM program. AutoCAD was first released as a desktop app running on Apple II and IBM PCs. From January 1986 AutoCAD was released for Intel 80386 and Motorola 68000-based RISC microcomputers. The first release of AutoCAD for Apple Macintosh was in January 1988. In 1989 it was ported to the Macintosh as a native application, running in OS 9, and it also ran in Mac OS 8 and OS 9. It was sold directly to construction firms in 1993 under the name of the construction software application Autocad 2000. AutoCAD 2000 was the first of the AutoCAD series of products to run on Windows. Later versions used the Windows API (application programming interface) instead of the Apple Tcl-based Applescript language. The first version of AutoCAD to run on Windows NT is AutoCAD 1998. The first version of AutoCAD to run on Windows 2000 is AutoCAD 2001. The first version of AutoCAD to run on Windows Vista is AutoCAD 2006. The first version of AutoCAD to run on Windows 7 is AutoCAD 2009. AutoCAD LT 2013 is the first version of AutoCAD to run on Windows 8. Since the introduction of AutoCAD, CAD software has advanced dramatically and been dramatically reduced

Launch the Activation Wizard on Autocad and select [Autodesk: Activate Autocad.exe]. If the activation code is not present and the program starts normally, there may be a problem with your system. You can try to use a different activation code, or the following fix will work: Restart the computer and launch Autocad. After startup, you should not receive any message related to the activation. Australian politics has been rocked by the stunning resignation of Treasurer Joe Hockey, who has called time on his stewardship of the nation's finances, and his resignation may have wide repercussions. The Coalition prime minister, Malcolm Turnbull, has promised that the government will continue with its planned tax cuts, but a report in The Australian today suggests the government may have to postpone planned income tax cuts in 2019. Mr Turnbull is due to unveil his 2019 budget in May. In a statement, Mr Hockey said he was resigning as treasurer because he had no confidence in the government. "The government had a once-in-a-generation opportunity to clear the decks and start afresh and to ensure the Budget is a strong, clear and progressive Budget," he said. "Unfortunately it has delivered a Budget that is broken, unworkable, unfair and that risks another recession. "This government has become the worst ever in the history of Australia." Mr Hockey denied any responsibility for the Budget's broken promises. "This is a responsible government not a spend-and-die government. It is time for this government to show responsibility and integrity," he said. "It has abandoned its responsibilities and the will to govern and to deliver a Budget that is an active and productive fiscal policy." He accused the government of "naked political ambition" by following the path of former treasurer Wayne Swan. "That is what this government wants to do, to come up with a Budget which is based on no principle, but merely on how they can spend your money more cheaply," Mr Hockey said. The Treasurer's comments came as federal ministers were still rushing to fill the void. The Nationals are urging the government to shift jobs from the Northern Territory, and the Greens are calling for the full employment guarantee to be made universal. Finance minister Mathias Cormann confirmed Mr Hockey had "resigned" and that he was "looking for new leadership for the finance portfolio." Labor
